

## WOW! Videos

# Why? What? and How?

Often experiments pupils would love are too dangerous, too messy or require specialist equipment to use at school. WOW! Videos have been created to promote awe and wonder in your pupils. In them the Curiosity Team at Winchester Science Centre showcase some amazing experiments. Stream these straight into your classroom. They are designed to use the power of science to support your pupil's learning in many ways, across the curriculum.

### WOW! Video menu

- **Space solar system:** Meteorite Drop
- **Space travel:** Build a Comet
- **Sound natural:** Whip Crack on Fire
- **Sound:** WOW! Water Bending
- **Environment habitats:** Hibernaculum Searching
- **Environment climate & weather:** Nitrogen Clouds

## Ideas for making the most of the WOW! Videos

### Science lesson starter

- Select a related WOW! Video and use as a lesson starter.
- Encourage discussion about the experiment.
- Link the videos to your lesson planning.

### A hook for English

- Use as a stimulus for writing.
- Use to support vocabulary development or sentence construction.
- Try as a hook for creative writing, poetry or report writing.
- Consider using as a resource for instructional writing.

### Start of the day

- A WOW! Video could start off your school day.
- A short powerful video can grab attention.

### Theme for a week

- Use a WOW! Video as theme for a week.
- Share the video and set daily challenges to research for more information.
